DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 8/7/03 has been considered by the examiner.

Additional Art Cited

Richardson discloses a method for cross-connecting optical signals at high speed.

Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited references teaches or fairly suggests (1) a method for routing a first optical beam having the step of "orienting the first mirror and the second mirror such that the first and second optical beams are coincident at both the first mirror and the second mirror." (claim 1, lines 8-9) in combination with the remaining steps recited in the claim; and (2) a system for routing a first optical beam having "a controller operable in response to information indicating respective positions of incidence of first and second optical beams on each of the first and second steerable mirrors to locate the first and second optical beams coincidentally at both the first and second steerable mirrors." (claim 10, lines 5-9) in combination with the remaining features recited in the claim. Claims 2-9 and 11-19 are dependent claims and thus allowable at least for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
